

EVOLVE

Gladiator RE100

Water-resistance external battery
with the capacity 3 000 mAh

Specifications

- High capacity battery with the capacity 3 000 mAh
- Water-resistant according to the specification IP67 (1 water column meter for the time of 30 minutes)
- Shock-proof and vibration-proof
- Rubberized resistant surface with the reinforced inner frame for the resistance improvement
- Suitable for charging the mobile phone, the tablet and other devices
- Automatic switch off after 30 seconds, if there is no other device for charging connected
- Two practical hanging loops for hanging e. g. to the backpack
- SOS light emergency signal
- Charging from the electric network or the computer USB port option
- Torch
- UV light
- Laser pointer
- MicroSDHC cards reader
- LED diodes for showing the battery charge status
- Battery voltage: 3.7 V
- Input voltage: 5V DC±0.5V
- Output voltage: 5V DC±0.2V
- Maximal output current: 1 A
- Proportions: 112 x 54 x 25 mm
- Weight: 191 g

Description

External water-resistant accumulator is suitable for the mobile devices which you need to recharge at travelling (mobile phone, tablet, and so on) and everywhere where the access to charging from the electric network isn't possible. The accumulator is water-resistant and it is also equipped with the torch, the laser pointer, UV light and the memory microSDHC cards reader. In case of emergency it is possible to activate SOS - after pressing the torch button for the time longer than 2 seconds, the SOS LED blinking will be activated, three short and two long light signals.

Charging

- Electric network (power supply with the output current minimal 500 mA)
- Car lighter
- Computer USB port

Package includes

- EVOLVE Gladiator RE100 - water-resistant external battery
- USB recharging cable
