Blood pressure monitor
OLED display
Waterproof IP67

EVOLVEO FitBand B2

MODERN FITNESS BRACELET HEART RATE AND PRESSURE TRACKER

The stylish look makes the device an elegant fashion accessory. Therefore it is suitable for both sportswear and casual wear. Track the course of your activities on the OLED display with a one soft touch. The OLED display shows call notifications, text or calendar notifications received from a paired iPhone or Android phone. Evaluates your progress and translates it into clear graphs and statistics. There are two colour designs available (black and turquoise) in the package.

Blood pressure measurement has never been easier and more affordable

The fitness bracelet is equipped with the latest digital sensor for easy and fast blood pressure measurement. The measured blood pressure can be immediately shown on the bracelet display and later you can also track the history of all the measured values in your mobile phone application. EVOLVEO FitBand B2 is not a medical or diagnostic device, but it is a suitable supplement for monitoring blood pressure for your reference.
