EVOLVEO / DATA ACT

Product data information

EVOLVEO SportWatch M1S GPS SIM, smart sports watch with GSM SIM support, grey-black strap

Product	FIT SPW-M1S-BLACK | EAN 8594161339731
Issued by	Abacus Electric, s.r.o. | Company ID 45022828 Planá 2, 370 01 Planá, Czech Republic
Contact	helpdesk@evolveo.com
Issue	27. 10. 2026 | updated 29. 10. 2026 | version 2.0

1. Connection and user interface

Bluetooth with a phone; standalone GPS and GSM SIM. EVOLVEO Fit.

2. Types of data and how they arise

Movement, steps and sports activity data, GPS location and sports function results. Calorie calculations are derived indicators. SMS, calls and music are separate communication / content functions. Data arise while wearing the watch and during active sports tracking; further information arises when individual functions are used.

3. Storage and retention

Data are accessible on the watch and in the connected EVOLVEO Fit app. The product page does not specify retention periods.

Data access and management

4. Data access and retrieval

Pair the watch with EVOLVEO Fit using the QR code in the instructions. View activity overviews on the watch and in the app. For account, export or deletion requests that cannot be handled directly in the app, contact the app support; helpdesk@evolveo.com can help identify the appropriate procedure.

5. Deleting data and the account

The product description does not give a complete procedure for bulk deletion of synchronized data.

6. Data formats and availability

Numerical data and overviews on the watch and in the app. The file export schema is not published. Transmission and data freshness depend on the device being powered on and on connection and service availability. Local files are accessible through supported storage. This sheet does not promise continuous cloud connectivity, a specific response time or a universal export of all internal data.

7. Data requests

Requests and technical support: helpdesk@evolveo.com. State the model, device identifier and scope of the requested data. Do not send the account password. The applicant's authority must be verified before any account action. A data request is not in itself consent to account deletion. Technical administration limitations do not waive the user's statutory rights.

Services and responsibilities

8. Roles of Abacus and the provider

Abacus Electric, s.r.o. issues the product information and provides customer support. It has no access to customer accounts or their data. These are managed by the user and platform provider. The app publisher in the store and the technical service operator may be different entities.

9. Use of data

Abacus uses available aggregate numbers of users and active devices and app crash statistics provided by Google and Apple solely for support and diagnostics. These reports are not a customer archive of product data. Abacus does not pass them to other recipients for their own use.

10. Transfer to a third party

A request for access to available data or its transfer to a third party of your choice can be sent to helpdesk@evolveo.com. Processing respects the applicant's authority and technical access to the data. If an external platform manages the data, the request is handled through its interface or with its provider. You can transfer already downloaded files to a third party yourself.

11. Using and ending the service

Local product functions are used according to the instructions. Connected services are governed by the terms of the specific app. Removing a device, deleting an account and cancelling a paid subscription are separate actions. Uninstalling the app alone neither cancels a subscription nor deletes the cloud account.

12. User rights

The user may exercise rights to access and share available data under Regulation (EU) 2023/2854 and lodge a complaint with the competent authority designated under Article 37. Personal data rights remain unaffected. Any trade secret protection must be assessed for the specific data; this sheet does not classify all data as trade secrets or introduce a general prohibition on sharing.

Data volume and sources

13. Operational data volume calculations

Calculation basis: 1 B = 8 bits; 1 kB = 1 000 B; 1 MB = 1 000 000 B. Volume = number of records × record size. The encoding and frequency below are calculation inputs, not confirmation of the internal format or actual device reporting frequency. A coordinate pair represented by 2 × 8 B uses 16 B. Sixty location points generate 960 B of coordinates alone. Identifiers, time and other activity data are excluded; the frequency is not a device setting. Time, identification, field names, protocol, security and retransmissions increase the total volume. The calculation is neither an export file size nor mobile data plan consumption.

14. Scope of information

Information about Abacus practices is based on the company's confirmation. Product functions are based on its documentation. External apps are subject to the provider's terms for the specific account, region and plan. The calculation scenarios do not replace a confirmed product data schema. This document is neither an EU declaration of conformity nor a Data Act compliance certificate.
