- Weight: 199 g (with the battery)

Description

EVOLVE FX520 - the high-performance dual core crossover between the phone and the tablet (phablet).

The heart of the phone is the dual core processor that will ensure the quick start of the telephone, internet browsing and the output for the exacting games. It will also provide you with the comfort of the big 5.0" display and the possibility of being available on both SIM cards at the same time.

The capacity touch 5.0" display with the high definition is ideal for internet browsing, making phone calls or playing games. The quick data transfer 3G support or 5.0 megapixel photo camera with automatic focusing and the flash are the matter of course.

You will surely appreciate the Wi-Fi hotspot function that will create the wireless Wi-Fi net in

the surroundings of its phone. You can then easily share your data connection in your phone for the internet access, e. g. in the laptop.

The new innovative operating system Android 4.1 Jelly Bean has the quicker response at the touch, the new information bar notification, the better widgets management, the improved photo camera and many other improvements.

The phone is on top of that equipped with the advanced function of turning on and off in the set time, which will substantially prolong the battery endurance.

EVOLVE Performace pack (preinstalled games and applications in the phone): AVG antivirus, EVOLVE Sonix, Google Actualities, Google+, Google Music, Google Maps, Google Navigation, Facebook, Skype, Youtube and others
