### 1. Technical specification

- large 2.4" colour screen
- 240 x 320 pix screen resolution and 262 000 colours
- Dual SIM - two simultaneously active SIM cards in one phone
- GSM 850/900/1800/1900 MHz
- Bluetooth 2.0
- GPRS class 12
- SMS/MMS/WAP
- JAVA
- microSDHC card (up to 32 GB) support
- MP3 player
- 2.0 MPx camera
- front VGA camcorder
- high capacity 1 700 mAh battery
- call duration: ca 400 minutes
- standby: ca 170 hours
- dimensions: 125 x 57 x 23 mm
- weight: 166 g (battery included)

## Access codes

If you forget your access codes, contact your service provider.

- PIN (Personal Identification Number) - This code protects your SIM card against unauthorized use.
- lock code - protects your mobile phone from misuse (factory setting: 0000)
- IMEI number - International Mobile Equipment Identity

## 2. Getting started

### Introduction

#### 1 Detach the screws

Detach the screws from the battery cover (turn counterclockwise).

#### 2 Open the battery cover

Open the battery cover.

#### 3 Insert SIM card

After opening the battery cover insert SIM card into the slot.

#### 4 Insert microSD card

Insert microSD card into the slot as shown in the picture.

#### 5 Insert the battery

Insert the battery, put the battery cover back and tighten it with screws (turn clockwise).

#### 6 Charge for 12 hours

When the device is used for the first time we recommend you charge the battery for at least 12 hours.

Make sure that the screws are tightened properly to guarantee the waterproofness of the phone.

## Insert the SIM card

- There is a danger of damaging the SIM card slot by inappropriate manipulation of micro SIM card.
- Remove the battery back cover
- Insert a SIM card into the slot
- When using microSDHC card, insert the card into the microSDHC card slot
- Install the battery
- Return the battery cover and tighten gently the screws. The screws have M2 threads, they could break when tight with force.

## Device description

## 3. Switch on

- press and hold the power button (the on/off button on the keyboard)
- when requested, enter your PIN code and press OK
- select the language with the left arrow key and confirm with OK.

## 4. Options and settings

Use the arrow keys (navigation keys) for navigation through the menu. Typing errors, use the key under the “Back” sign. Press the key under the “Menu” sign to enter this menu.

Use the graphic menu for faster orientation and easier setting of your mobile phone. Use the navigation keys for navigation through the menu. The selected icon will be highlighted and the name of the application will be displayed at the top of the screen. Confirm with the OK central button.

## Contact list

• **Add New Contact** - *Option* - *Into phone memory* - *OK (enter data)* - *Option* - *Finished* - *OK* - *Save (confirm save)*

Options to save a contact - *Into SIM memory* - *OK (enter data)* - *Option* - *Finished* - *OK* - *Save (confirm save)*

Contact options - contacts can be further edited, deleted, copied and sent as a vCard. These operations can be found in the **"Option"** menu.

• **Settings** - in settings you are able to copy contacts to another storage location, to create a vCard, check memory status or delete all contacts.

*Add New Contact* - *Option* - *Settings* - *Select* (select one of the options)

## Multimedia

Taking pictures, image browser, FM radio and digital recorder

**Camcorder** - **Camera** - **Camera Settings** by pressing the keypad

- **switch to** - *front or back camera, entering photo album*
- **Photography mode** - *changing camera mode*
- **Scene mode** - *selecting Auto or Night mode*

- Select "Connection" then select "Option" WiFi connect/disconnect possibilities Enter the password if required.
- WiFi Disconnecting - select available network connection - *Option - Disconnect - Select*

- WiFi repeater *Settings - OK - WiFi - OK - select available network connection Option - Connect - Select*

## Connection

Setting the Data services. The Data services have to be enabled by service provider (3G/GPRS).

Turning on the Data services

*Setting - OK - Connection - OK - Data services - OK - On/Off - OK*

Internet browser “Opera Mobile” can be found in menu “Internet connection services”.

## Internet tethering

Use your phone as a HotSpot to create wireless network and share its data connection with another device (e.g. notebook).

**Creating Hotspot** - The Data services 3G/GPRS must be on (Settings -> Connection - Data services - On), activate internet browser “Opera Mobile” and check whether the internet connection is functioning or not. Activate the Wifi HotSpot (Settings -> Internet tethering -> Wifi HotSpot - On). The phone asks you to turn the Wifi on, select yes. Now the Data services connection is available to other devices.

## Phone settings

Setting date and time, turning on and of the phone at pre-set time, changing language, fonts, short cuts, function of the keys to quicken up the manipulation, setting the auto update of time, setting the Dual SIM mode, the Plane mode etc.

- **Dual SIM settings** - “User-select” and “Auto-select”. If the “User-select” option is chosen you can change SIM1 and SIM2 slots as you need.
- **Restore to factory defaults** - it requires THE PHONES SECURITY code (The factorydefault code is “0000”). To restore the phone to the factory defaults confirm this option.

- **Flight mode** - It is not possible to make or receive calls
- **Uncategorised** - setting the brightness level and screen saver pre-set time

### **Mobile network settings**

Network settings (it is set by operator).

### **Security settings**

Changing the phone and SIM cards PIN codes, setting the screen display lock.

### **Dual SIM settings**

Switching between SIM slots and turning off one of the SIM slots.

### **Display properties**

Changing the wallpaper. It is also possible to use your own wallpaper from microSDHC card, changing font size and boot animation.

## Do you still need advice after reading this manual?

First, read “Frequently Asked Questions” at [www.evolveo.eu](http://www.evolveo.eu) or contact the EVOLVEO technical support. This product goes through constant development and improvement. Therefore it is possible that the actual design, function or operations won't fully correspond to conditions written in this user manual. Possible differences of the product are not defects, therefore they are not grounds for a warranty claim.

### The warranty DOES NOT APPLY to:

- using the device for other purposes than it was designed for
- electrical or mechanical damage caused by improper use
- damage caused by the natural elements such as fire, water, static electricity, power surges etcetera
- damage caused by an unauthorized repair
- damage to the guarantee seal or an unreadable serial number on the device

### Disposal

The symbol of crossed out wheellie bin on the product, within the literature or on the packaging reminds you that in the European Union, all electric and electronic products, batteries and accumulators must be stored as assorted waste after the end of their service life. Do not throw these products into the unsorted municipal waste.
