QUICK START GUIDE

EVOLVEO
StrongPhone X1

Quick Power On

1 Open the battery cover

Rotate the screws to a counterclockwise direction as the pictures showing and then open the battery cover.

2 Insert SIM card

Insert the SIM card to the right slot with a slight push.

3 Insert a Mini SD card

Push the SD card slightly and make sure it is inserted in the right slot.

4 Insert a battery

Insert the battery as instructed

5 Refit the back cover

Refit the battery cover and then tight the screws up.

6 Charging 12 hours

We strongly suggest that when you first use the batteries, please make sure them fully charged for 12 hours.

To change the display language, press the center button to the left

Speaker
Camera

Dear customer,
thank you that you have chosen EVOLVEO mobile phone.
Here are some recommendations related to its safe use:

- ▶ EVOLVEO StrongPhone X1 is designed to be a lot more durable than a regular cellphone, however, it is not completely indestructible.
- ▶ EVOLVEO StrongPhone X1 complies with IP67 certification. However, even this compliance doesn't assure it's complete waterproofness.
- ▶ It is crucial to keep the headphone jack as well as the microUSB port clean and sealed, as well as to keep all screws on the back side firmly tightened, in order to maintain the water and dust resistance of the phone.
- ▶ Given many different possible modes of operation (e.g. with or without USB cable attached) we are not responsible for liquid damage.
- ▶ The phone screen is made out of a hardened glass, which can break upon hitting hard surface, when exposed to a strong impact, or when the screen is being bent or otherwise deformed. In case the screen is damaged, do not attempt to repair it. Glass broken as a result of a misuse or abuse is not a subject to warranty.
- ▶ Clean the cellphone immediately if it gets in contact with products which can cause stains, such as ink, color, makeup, food, oil, etc. Disconnect all cables, turn the phone off and use a soft, damp cloth. Do not use window cleaners, household cleaning products, aerosol sprays canisters, solvents, alcohol, ammonia or abrasives.
- ▶ This phone is a complex electronic device, therefore it should be protected against impact and electromagnetic field effects, it is not resistant to metal dust or other metal particles.
- ▶ In case your phone falls in water, do not press keypad buttons, immediately brush it with a dry cloth, remove the battery and let it dry before turning it back on again.

- ▶ Do not attempt to dry using external heat source, such as microwave or a hairdryer.
- ▶ EVOLVEO StrongPhone X1 is intended for use in operating temperatures from 0° to 40°C and can be stored in a temperature range from -20° to 45°C. Lower or higher temperatures can affect the cellphone operation or battery life.
- ▶ Do not use outside during storm, we hold no responsibility for eventual device damage or injury caused by such operation.
- ▶ Do not puncture the speaker, do not insert any objects in ports. Do not paint the phone with color as this can affect the phone functionality and waterproofness.
- ▶ Description of this phone operation may differ from this manual, based on the firmware version of your phone and specific terms and conditions of your mobile operator.
- ▶ EVOLVEO StrongPhone X1 was tested in compliance to EU radio waves, WiFi, Bluetooth and SAR standards. In case you want to limit the effects of high-frequency energy, limit the duration of your direct exposition to the electromagnetic emissions, e.g. by using a Bluetooth hands-free set or keep a greater distance between your body and the cellphone.
- ▶ Never attempt to repair the phone by yourself, any disassembly can lead to a damage of the device, which is not covered by the warranty.
- ▶ In case the phone was subject to authorized maintenance, its water and dust resistance might be negatively impacted.
- ▶ Manufacturer, resellers and vendors hold no responsibility for any data loss and direct or indirect damage, related to the use of this phone, no matter how exactly it is caused.
- ▶ Repair and maintenance can only be handled at an authorized service place for EVOLVEO phones (more informations on www.evolveo.eu), otherwise the phone can be damaged and warranty could be void.

Troubleshooting

The phone can't be switched on

- ▶ The key for switching on the phone wasn't pressed long enough.

Press the key for „Power On“ for 3 seconds at least (or longer).

- ▶ The battery is low.
Recharge the battery.
- ▶ The SIM card has failed.
Check or replace the SIM card.

Charging of the phone failed

- ▶ The contact is defective.
Check the contacts, change the cable or the charger.
- ▶ The charging voltage is too low.
At first, charge about half an hour, then disconnect the charger and again re-connect and charge the battery completely.
- ▶ The wrong charger.
Use proper charger.

The phone call can't be made

- ▶ The SIM card failure.
Check or change the SIM card.
- ▶ The dialling mistake.
Dial the number again.
- ▶ The credit is used up.
Contact the operator.

The partial call failure.

- ▶ You have the wrong number.
Check the phone number.
- ▶ The wrong setting.
Check the call blocking.

The wrong PIN

- ▶ You have entered the wrong PIN code three times.
Contact the operator.

The SMS/MMS can't be sent

- ▶ The service for your SIM card isn't activated or the SMS/MMS center number isn't set up.
Contact the operator and get the SMS/MMS center number.

The automatic locking failure

- ▶ Entering the wrong code (forgetting the code).
Contact the EVOLVEO service center.

Mobil phone keeps switching off itself

- ▶ The battery is low.
Recharge the battery.
- ▶ The failure in settings.
Check if the function for automatic switching off isn't active.
- ▶ The coincidental failure.
Switch the phone on again.

The phone isn't ringing at the incoming call

- ▶ The volume is lowered to the minimum.
Set the volume again.

The call is difficult to hear

- ▶ This phone is waterproof, so the microphone is protected by a waterproof membrane that prevents water penetration and slightly attenuates the sound from the microphone.

We recommend to speak directly into the hole for the microphone and speak louder than usual for conventional phones.

Phone lock

This feature protects your phone against unauthorized use by others.
Factory reset code is „1122“.

Specification

- Waterproof (IP67)
- Dual SIM support
- Shockproof and vibration resistant
- Torch with dedicated button
- 2.2" display
- Display 240 x 320 pixels, 262 000 colors
- GSM 850/900/1800/1900 MHz
- GPRS class 12
- SMS/MMS/WAP
- Polyphonic ringtone/vibration ringtone
- microSDHC card support
- Bluetooth 3.0
- FM radio
- MP3 Player
- 2.0 MPix camera
- Video recorder
- Videoplayer
- microUSB connector
- Li-Ion battery 1 700 mAh

Warranty doesn't apply to:

- ▶ mechanical damage caused by inappropriate use (such as broken screen, damaged microUSB power connector or headphones output etc.)
- ▶ damage caused by natural events such as fire, water, static electricity, heightened temperature, etc.
- ▶ damage caused by unauthorized servicing
- ▶ intentional damage
- ▶ the battery after 6 months does not hold the capacity (warranty on the battery capacity is 6 months)

Disposal

The symbol of crossed out container on the product, in the literature or on the wrapping means that in the European Union all the electric and electronic products, batteries and accumulators must be placed into the separate salvage after finishing their lifetime. Do not throw these products into the unsorted municipal waste.

DECLARATION OF CONFORMITY
