**WiFi**  
**HDMI 1.4**  
**Google Play support**  
**Support for 2.4 GHz wireless keyboard and mouse**

## EVOLVEO Smart TV Stick D2

**EVOLVEO Smart TV stick D2 is will transform your TV into a multifunctional Android SmartTV**

It is powered by the Android 4.2 Jelly Bean operating system, just like modern Android smartphones or tablets. Use your favourite Android applications, such as Google Chrome internet browser, weather forecast, internet radios, streaming videos from You Tube or thousands of games from Google Play. High performance is ensured by a fast dual-core processor - each core runs on frequency up to 1.6 GHz and RAM is 1 GB. Fast wireless internet connection with encryption support is enhanced with an integrated tipping external antenna.

You can easily turn it into a high-performance multimedia centre, if you connect external storage with movies, music or pictures, such as USB flashdrive or external portable harddrive. Internal memory can be extended using microSDHC cards. We suggest buying modern wireless EVOLVEO FlyMotion remote control for the maximal control comfort.

### Specification

- processor Dual Core 1.6 GHz
- Quad Core 3D Mali-400 GPU
- RAM 1 GB
- integrated internal memory 4 GB
- integrated external WiFi antenna
- operating system Android 4.2
