### **8.#**

Different functions under different menus.

Switch input method under text edit interface.

Long press change user profiles under standby interface.

**Notice:**

- 1).Short press means press and release at once; Long press means keep pressing for over 3 seconds.
- 2).All function menus are for keyboard operating. Please follow the guidance on the LCD for touch operating.

**PREPARION****INSTALL SIM CARD**

Any scratch and bend may easily damage the SIM card. Please be careful when insert, take out and preserve the SIM card.

Please make sure the phone is power off and battery is free before SIM is taken out.

Take the back cover off and find the SIM card slot. Put SIM card in the slot right. Please make the metal part of the SIM card down and the edge angle match the slot shape.

**INSTALL SD CARD**

SD card is supported. Please make sure the SD card is installed properly.

Take out the battery and find the SD card slot. Release the slot cover and make the metal part of the SD card down. Pay attention to the edge angle. Close the slot cover after SD card is totally plugged in the slot properly.

**INSTALL BATTERY**

Open the back cover.

Insert the battery into the battery slot.

Close the phone cover.

## **REMOVE BATTERY**

Power off the phone first and push down the back cover.

Remove the battery from the battery slot.

## **CHARGE BATTERY**

Insert the charger plug in the charging interface, and then connect the other side to the power socket. If the phone is power on and the stripes at the top right of the screen keep rolling, the phone is charging. When the stripe is full of the whole icon and stop scrolling, battery charging is completed; The charging scroll icon will still be rolling when the phone is charging after power off.

Pull out the plug after charging is completed.

·When battery is low, the phone will warn you. While capacity is too low, the phone will automatically power off. Please do not make battery under low power for a long time because it will damage the quality and longevity.

·It is normal that when battery voltage is too low, there will be a pre-charging process without any charging signs.

## **SECURITY PASSWORD**

Mobile Phone Password

Password prevents your phone from being used without permission. (Original password is 1234). Please change your password for safety.
